

# 10

## 4.2

Samantha has public key  $\{N, v\} = \{1562501, 87953\}$ .

Adam claims Samantha has signed the documents:

Which of these are valid signatures.

Note: since RSA is being used for signatures, the public key is called  $v$  for verity rather than  $e$  for encrypt.

**a**

$$h(D) = 119812 \quad S = 876453$$

✓ **Answer** ✓

$$\begin{aligned} S^v \pmod{N} \\ = 772481 \end{aligned}$$

No, this is not valid

**b**

$$h(D) = 161153 \quad S = 870099$$

✓ **Answer**

$$\begin{aligned} S^v \pmod{N} \\ = 161153 \end{aligned}$$

Yes, this is valid

**c**

$$h(D) = 586036 \quad S = 602754$$

✓ **Answer**

$$\begin{aligned} S^v \pmod{N} \\ = 586036 \end{aligned}$$

Yes, this is valid
